

Catherine Guillouard appointed RATP President and Chief Executive

Paris, France (August 23, 2017) – Earlier this month, the President of the French Republic appointed Catherine Guillouard to President and Chief Executive of RATP at a council of ministers meeting on August 2, 2017. The appointment was made after hearings with Ms. Guillouard before the Sustainable Development and Land Use Planning commissions at the National Assembly and French Senate on July 26, with both assemblies voting in favor of the appointment. The RATP board of directors had previously held an ad hoc meeting on July 12 to submit their appointment of Guillouard to the position to RATP President and Chief Executive to the government for ratification.

“It is a great honor to be joining RATP,” said Guillouard, immediately after assuming her new position. “It is such a dynamic and innovative company with many assets to become a world leader in sustainable, connected, and urban mobility thanks to the professionalism of its staff, its multiple fields of technical know-how, and a culture of operating excellence offering the best possible service to passengers.”

“The “2025 Challenge” corporate strategy plan will be at the heart of my actions and of the executive team’s work to face the challenges before us,” Guillouard continued. “Among the top challenges are to prepare for deregulation in our historic territory, our international expansion, and to continue our ambitious innovation policy in terms of services and new forms of mobility, while remaining faithful to the quality of labor dialogue and our public service values”.

Catherine Guillouard started her career at the Treasury department of the French Economy Ministry before moving to Air France for ten years, where she served as Deputy Vice President for flight operations, Deputy Vice-President for human resources and Executive Vice President, Finance. In 2007, Guillouard became Chief Financial Officer at Eutelsat Communications and accordingly a member of the Executive Committee. In 2013, she joined Rexel as CFO before becoming its Deputy Chief Executive Officer in 2014.

Ms Guillouard is a member of the Board of Directors of Engie and Airbus and previously served on the Board of Directors of Aéroports de Paris (ADP Group). She is a graduate of the ENA and Sciences Po Paris, and also holds a DESS postgraduate degree in EU law.

About RATP Group:

With nearly 16 million daily passengers worldwide, 14 metro lines (including two driverless lines), two regional express rail lines, seven tramway lines and 350 bus lines, the multimodal network operated by RATP in the Paris region is the largest in the world to be managed by a single company.

RATP Group can devise, design and implement infrastructure development projects, operate and maintain networks irrespective of the mode of transportation (metro, regional train, tramway and bus) and develop innovative services to promote mobility (including passenger information, remote ticketing, pricing and customer marketing). The automation of the Paris metro's line 1 completed at the end of 2012 is a world's first and once again demonstrated RATP Group skill in concluding particularly complex projects.

RATP Group exports its know-how all over the world; in engineering through Systra, its subsidiary jointly owned with SNCF, in operations and maintenance via its wholly-owned RATP Dev subsidiary and in innovative services to promote mobility through its IXXI subsidiary.

RATP Group has a workforce of nearly 60,000 employees worldwide and in 2016 generated revenue of 5.4 billion euros.

About RATP Dev:

Founded in 2002, RATP Dev operates and maintains urban transportation systems in 14 countries on four continents (United Kingdom, France, Italy, Switzerland, Algeria, Morocco, South Africa, Saudi Arabia, Qatar, India, China, South Korea, the Philippines, and the United States of America). With more than 1.5 billion passengers travelling on its networks every year, RATP Dev demonstrates every day its extensive and renowned expertise in a wide range of mobility services, ranging from rail, regional express rail, tramway, to bus, cable car and sightseeing activities. RATP Dev leverages in France, outside of Paris, and across international markets the technical expertise and experience of RATP Group, the leader in driverless and tramway operations and operator of the Paris network, one of the largest public transportation networks in the world . In North America RATP Dev employs over 3,800 team members transporting more than 78 million passengers in 18 states and operates a wide range of services.
